

The Preferred Exterior Wood

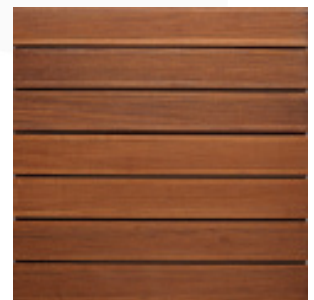

Ideal for condo or apartment balconies, high end homes, roof decks, walkways, landscaping features, or on existing wood decks or cement patios.

- ✓ Made from an Brazilian hardwood called Ipe.
- ✓ Virtually indestructible and naturally resistant to rot & decay
- ✓ Very durable, a 25 year service
- ✓ A great way to add style and value to your project
- ✓ Cost effective, durable and easy to install & rearrange
- ✓ Low maintenance - just brush or wash with wood soap to clean
- ✓ A beautiful silvery gray when left to age naturally, resembling a Teak deck on a boat.
- ✓ Assembled with special hidden fasteners
- ✓ Similar pricing to composite decking material , but looks good!
