

Etoile magique **A mega catamaran**

Designer references

M. Bob Escoffier, Navigator - Etoile Marine Cruises

Project presentation

Based in Saint-Malo, Etoile Marine Cruises boasts one of the most beautiful fleets in Europe. Its latest sailing boat, the maxi catamaran Etoile magique, is the jewel of the Group – and a wonderful example of the use of Joubert products on a really ambitious work. Born from Bob Escoffier's imagination, made entirely from plywood selected from the Joubert Marine range, Etoile magique has exceptional dimensions - 25 mètres long and 11,50 wide, making a total deck surface of 250 m² ! – enabling it to sleep up to 24 people.

Launched in December 2004, it sails over the whole Atlantic ocean, as far as the West Indies and Cape Verde.

The Joubert Group is delighted to be linked to this wonderful success which combines a technological achievement with conviviality.
