Sustainability

DuChâteau believes our future is built on preserving our environment for generations to come. To this end, DuChâteau® hardwood flooring* is certified to the Forest Stewardship Council® Chain of Custody Standard (FSC®), Lacey Act Compliant, a partner of Global Relief, and a member of the U.S. Green Building Council with its floors qualifying for LEED® credits.

*Nominal top layer thickness measured prior to finishing processes. Finishing processes such as wire-brushing or hand-scraping will affect the overall thickness.

**These products are available as specialty items and are crafted per order. Please contact us for more details.

***Random length starter boards included. Specification excludes American Walnut; please see website or catalog for exact specifications.

Product Variation Disclaimer

Created to be a one-of-a-kind piece of nature’s artistry, each and every DuChâteau® wood product carries distinct variations in finish, patina, texture, grain and overall character that create the unique diversity and natural elegance of our flooring. It is virtually impossible to capture – in a small image – the entire range of color variation and character that will be present in the flooring you will receive. To better understand the unique look of a DuChâteau finished floor in your space, we recommend consulting your sales representative for more details.

Installation and Performance Disclaimer

Environmental conditions, such as exposure to light, and fluctuations in temperature and humidity, will greatly affect product performance from initial installation throughout its life. Refer to our website for installation guidelines or see your local sales representative for more information on proper steps and specific environmental conditions to successfully install, care for and ensure the lifelong performance of your floor.

---

Born out of a passion for artful design and a deep appreciation for nature, DuChâteau® proudly presents nine breathtaking collections of its exceptional hard-wax oiled, wide-plank hardwood floors. Offering the same sensory experience and longevity of old-world European surfaces, each engineered hardwood floor is an exploration of nature, art and ingenuity in design and sustainability.

The skillful pairing of traditional woodworking techniques and modern state-of-the-art technology, DuChâteau hardwood represents the true intersection of design and technology. Design we envision—where the signature touch of craftsmanship, rich color palette, and proprietary blend of select European woods intersect with the architectural opportunities we offer. Both known for their remarkable beauty and highly durable matte finish, DuChâteau's hardwood collection continues to lead the way for a design conscious lifestyle without any compromise.

**Sustainability**

DuChâteau® hardwoods are certified as a partner of Forest Stewardship Council® (FSC®), Lacey Act Compliant, a partner of Global Relief, and a member of the U.S. Green Building Council with its floors qualifying for LEED® credits.

*Excludes American Walnut

**Environmentally Safe**

All DuChâteau® Hardwood Flooring is CARB-Phase 2 compliant, using only formaldehyde-free adhesives with independent lab tests for all floor types. Rest assured, DuChâteau always puts customers’ safety and the environment first.

Hard-Wax Oil Finish

Each floor comes prefinished in the factory with a two-tracks hard-wax oil for an exceptionally protective matte finish. A traditional European finish, hard-wax oil combines all-natural components, such as linseed oil, tung oil, sunflower oil, jojoba oil, beeswax, carnuba wax, candelilla wax, resins and colloidal clay. By combining these oils’ wood-preserving qualities with the moisture repelling nature of the waxes, hard-wax oil offers a high level of durability, while still maintaining the true look and feel of the wood.

Wide-Plank

DuChâteau’s wide-plank floors begin with a minimum 7-7/16 inches, though custom sizes are available. Please see your local sales representative for more information.

Engineered Construction

DuChâteau floors feature a three-ply, cross-cut construction that not only maximizes floor stability and overall performance, but more efficiently uses the slow growth species where it matters most – on the surface of the wood. Below, at the substrate level, fast growth species are utilized for a lower ecological impact.

Surface Treatments

To give each collection its own story, each floor receives its own unique surface treatments, which accent the texture and graining of the wood. Distressing, wire-brushing, hand-sculpting and carbonizing are just a few of the many processes our floors undergo to transform a hardwood floor into a luxury design statement.

Variation

Integral to the allure of DuChâteau flooring is the tonal and textural variation in each floor. No two floors are the same. The production methods employed ensure customers receive a floor that is a work of art and innovation.

Hard-Wax Oil Finish

Each floor comes prefinished in the factory with a non-toxic hard-wax oil for an exceptionally protective matte finish. A traditional European finish, hard-wax oil contains all natural ingredients, such as linseed oil, tung oil, sunflower oil, jojoba oil, beeswax, carnauba wax, candelilla wax, resins and colloidal clay. By combining these oils’ wood-preserving qualities with the mineral properties of the natural hard-wax oils, enough stiffness and durability are maintained to ensure the true look and feel of the wood.

Wide-Plank

DuChâteau’s hand-surfaced floors begin with a minimum 7-7/16 inches, though custom sizes are available. Please see your local sales representative for more information.

Engineered Construction

DuChâteau floors feature a three-ply, cross-cut construction that not only maximizes flow stability and sound performance but, more efficiently, uses the slow growth species where it matters most – on the surface of the wood. Below, all the sub-layers are fast growth species for a lower ecological impact.

Surface Treatments

To give each collection its own story, each floor receives its own unique surface treatments, which accent the texture and graining of the wood. Distressing, smoking, wire-brushing, hand-sculpting and carbonizing are just a few of the many processes our floors undergo to transform a hardwood floor into a luxury design statement.

Variation

Integral to the allure of DuChâteau flooring is the tonal and textural variation in each floor. No two floors are the same. The production methods used ensure that customers receive a floor that is a work of art and innovation.

Mouldings

Available in a vast range of styles, all DuChâteau mouldings are color-matched to each floor for elegant transitions that only DuChâteau can achieve. All mouldings go through the same color treatments as flooring and will have the same inherent color variations.

Born out of a passion for artful design and a deep appreciation for nature, DuChâteau® proudly presents nine breathtaking collections of its exceptional hard-wax oiled, wide-plank hardwood floors. Offering the same sensory experience and longevity of old-world European surfaces, each engineered hardwood floor is an exploration of nature, art and ingenuity in design and sustainability.

DuChâteau hardwoods are some of the hardest woods available, with a rigidity that resists warping and splitting to maintain its strength and beauty. DuChâteau’s unique double-milled and micro-beveled edges combine the classic look of a parquet with the easy-installation of a plank floor.

The skillful pairing of traditional woodworking techniques and modern state-of-the-art technology, DuChâteau hardwoods represent the very best in luxury flooring for commercial and residential spaces. Design and craftsmanship will culminate in the perfect blend of old-world charm and modern functionality, providing an environment that is both comfortable and essential to the established and developing workspaces of today.

The finish DuChâteau is proud to offer is hand-applied and natural, without finishing variability; the same finish that brought DuChâteau so much attention early on within the architectural and design community. Known for their remarkable beauty and highly durable matte finish, DuChâteau® Hardwood Collections continue to lead the way for a design-conscious lifestyle unlike any other.

Sustainability

DuChâteau, through its membership in the Forest Stewardship Council® (FSC®) and as a partner of Global Relief, is a leader in sustainable hardwood flooring. Since its founding, DuChâteau has worked to lead the way in the development of sustainable wood products.

DuChâteau believes our future is built on preserving our environment for generations to come. To this end, DuChâteau® hardwood flooring is certified to the Forest Stewardship Council® Chain of Custody Standard (FSC®), Lacey Act Compliant, and is a member of the U.S. Green Building Council LEED® Registered Partner.

DuChâteau Hardwood Cleaners are a specially formulated floor cleaning solution that is suitable for cutting-edge natural wood floors. Our cleaners are biodegradable and have been created with the environment in mind.

Premium Floor Cleaner & Protectant

For the regular upkeep of your oiled DuChâteau wood floors, our specially formulated Premium Floor Cleaner & Protectant exists at the floor’s edge. Its formula is specially designed to prepare your floor for the maintenance of your floor and to provide a long-lasting, hard-wax finish.

Product Variation Disclaimer

Due to the natural variation in each tree, the grains and color of each wood species may vary. These natural variations are normal and occur as a result of the natural growth process. They are not indicative of defects or manufacturing error. DuChâteau offers a wide range of species, colors and finishes to meet the needs of all customers.

Installation and Performance Disclaimer

Environmental conditions, such as exposure to light, and fluctuations in temperature and humidity, will greatly affect product performance from initial installation throughout its life. Refer to our website for installation guidelines or see your local sales representative for more information on proper steps and specific environmental conditions to successfully install, care for and ensure the lifelong performance of your floor.
